Each room requires its own lighting concept that is right for the users, the architecture and the interior. At ERCO, long-standing experience with design-oriented architectural and object lighting within the various architectural segments comes together with state of the art LED technology. We have detailed the individual benefits of ERCO LED lighting tools for modern office, retail, museum, airport and facade lighting on the following pages.

As part of this, we respond to your most important questions concerning lighting with LED within the context of our essential fields of application.

ERCO Greenology® for sustainable lighting

We understand light as the fourth dimension of architecture – and thus as an integral part of sustainable building. ERCO Greenology combines ecological responsibility with technological expertise and is our strategy for sustainable lighting.

Our sustainability goals

The most effective lighting tools on the market

A CO₂ neutral light factory

Expansion of the circular economy

Yes to the UN Sustainable Development Goals

"Our luminaires enable light to be used specifically where it is needed – in other words, where human perception requires it. They become part of the architecture and support its flexible use in the long term. They also help to ensure that buildings consume as little energy and resources as possible."

Kay Pawlik, Managing Director

The 4 principles of our ERCO Greenology strategy

Innovation driven by technology

ERCO continuously invests in new technologies to improve our products and production processes – especially in terms of ecology. Each innovation must be measured against our sustainability goals in order to reduce the energy and resource consumption of lighting systems.

Efficiency driven by energy reduction

Optoelectronics is our core area of expertise. With perfectly matched components consisting of in-house developed lighting technology, electronics and thermal management, we guarantee the high efficiency (in lumens per watt) of our luminaires and thus reduce energy needs.

Effectiveness driven by quality solutions

Light only where it is needed and seen. Precise, application-oriented and maximally effective (in lx/W) – this is what makes ERCO lighting tools an integral part of any Human Centric Lighting solution.

Sustainability driven by responsibility

Light is our contribution to sustainable building. Developed for perception-oriented Human Centric Lighting, our lighting solutions support the flexible use of architecture by people and enable low-maintenance operation over the entire service life.

ERCO projects

Whether ancient monuments, extraordinary museums, modern working environments or public buildings: ERCO offers professional lighting tools for indoor and outdoor applications.

Work - indoor and outdoor luminaires for office and administration buildings

The lighting of office buildings encompasses more than the workplace and meeting rooms - it also includes the path and facade lighting outdoors. Concentrated work demands pleasant work surroundings with high visual comfort. As well as appropriate illuminance levels, this also includes optimum glare control and the balancing effect of vertical illuminance. A particular strength of ERCO is its downlights for track – a flexible and economical alternative to classic recessed luminaires.

Find out more: www.erco.com/work

Outdoors: Representing with light

Facades, entrances and reception areas are the first opportunities for companies to present their corporate identity via the office architecture. Light sculpts the architecture and subtly communicates attributes such as openness and transparency.

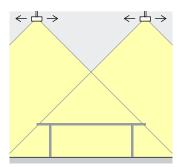

Facade luminaires p.212

Recessed floor luminaires p.256

Flexible workstation lighting

Modern companies work with changing teams and methods. Downlights that can be moved in the track are the ideal solution for a flexible office infrastructure.

Luminaires for track p.38

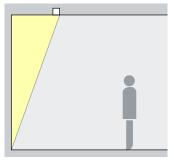

Task lights p.164

Vertical light for the first impression

Wallwashing communicates a welcoming gesture in the reception area. Bright walls lend the room depth and create a high impression of brightness. When wallwashed, foyers with glazed facades for example can be viewed from the outside and communicate a sense of openness and transparency.

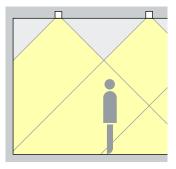

Recessed luminaires

Recessed luminaires

Integrated office lighting

A zoned, ceiling-integrated lighting concept with especially small luminaires achieves a calm ceiling appearance. Downlights with excellent glare control and oval wide flood light distribution support office activities and provide uniform general light.

Recessed luminaires p.98

Surfacemounted luminaires p.130

Surfacemounted luminaires p.98

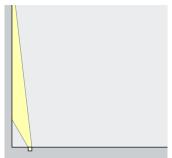

Culture – indoor and outdoor luminaires for museums and galleries

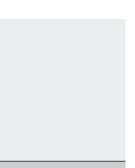

Museum lighting begins with accentuating light for outdoor sculptures and extends to suitable lighting tools for sensitive exhibits in the exhibition spaces. Lighting design options in muse-ums and galleries are, however, not merely restricted to the pres-entation of works of art. We show you how light is able to upgrade exhibition spaces to become qualitative cultural brands - ranging from sculpture gardens to the shop and café.

Find out more: www.erco.com/culture

Outdoors: Welcoming with light

At night, light transforms museums into urban landmarks by rendering its facade and outdoor exhibits visible. Accents in the foreground adopt the role of orientation points from afar.

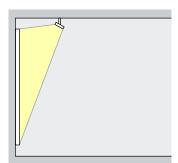

Bollard luminaires

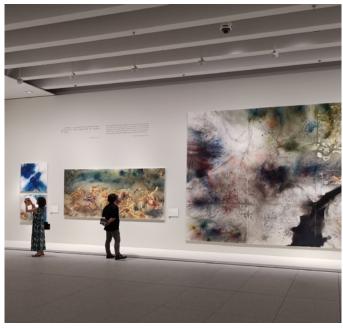

Recessed floor **luminaires**

Uniformly illuminating art

Wallwashing with high uniformity is suitable for illuminating works of art in museums, lighting shelving in sales areas and creating a wide and prestigious spatial impression in foyers.

Luminaires for track p.38

Recessed luminaires p.98

Making art an experience

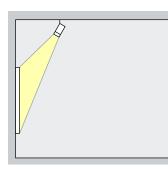

Light renders art perceivable for visitors. Spotlights with different light distributions are ideal for accentuating art.

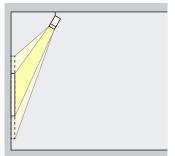

Luminaires for track p.38

Recessed spotlights, floodlights and wallwashers p.82

Crisp-edged illumination

Ideally illuminating exhibits of different sizes is their speciality: contour and zoom spotlights enable adjustable light distributions.

Luminaires for track p.38

Luminaires for track p.38

Community – indoor and outdoor luminaires for public buildings

Lighting for large facades, high foyers and multifunctional con-ference rooms are the focus of lighting design.

Buildings for public administra-tion, educational facilities, thea-tres, congress centres, railway stations and airports reflect the needs and reality of a society. Light assumes much more than just functional tasks – it also determines the character and representative symbolic force of public buildings.

www.erco.com/community

Lighting facades

Light plays a crucial role when providing public buildings with a prestigious identity.
It emphasises the architecture in its urban context. ERCO floodlights impressively showcase large facades.

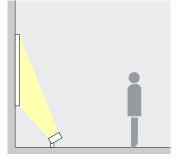

Projectors, floodlights and wallwashers p.194

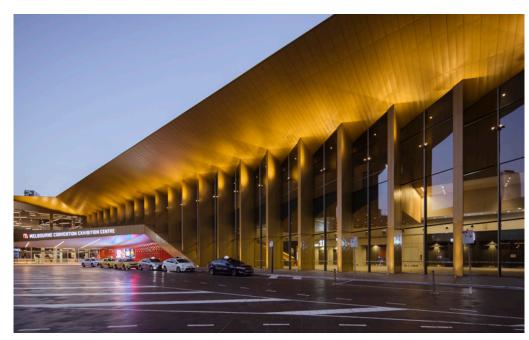

Facade Iuminaires

Recessed floor luminaires p.256

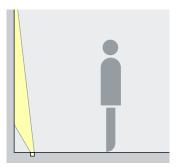

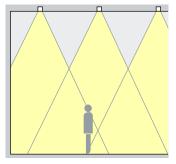

Facade luminaires p.212

Bollard luminaires p.228

Structuring high rooms with light

Clear and perception-oriented lighting concepts make public buildings user-friendly. Part of this is to define and structure large rooms with the use of zoned lighting. Luminaires with high lumen packages provide the required illuminance on the target surface.

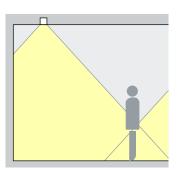

Luminaires for track p.38

Recessed luminaires

Surfacemounted luminaires p.130

Luminaires for track p.38

Pendant luminaires p.150

Recessed luminaires p.98

Light for a wide spatial impression in halls

In multifunctional rooms and event halls the atmosphere can be varied with different components for general lighting, vertical lighting and accent lighting. Suitable lighting tools are recessed luminaires with high illuminance levels and very good glare control.

Public & Outdoor - outdoor luminaires for facades, paths and more

Parks, public places, monuments and facades characterise the face of a city at night with their illumination. Their light provides orientation for various user groups, contributes to safety, enhances spatial details through accentuation and creates atmosphere. ERCO lighting tools for outdoor areas are designed to define urban spaces during nocturnal hours with highly efficient LED light, whilst receding into the background themselves thanks to their outstanding glare control.

Find out more: www.erco.com/outdoor

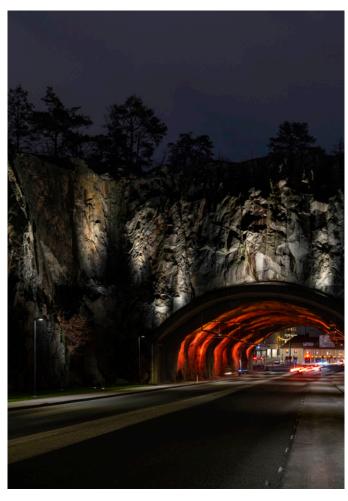

Projectors, floodlights and wallwashers

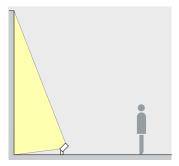

Recessed floor luminaires

Creating orientation points with light

Memorials and bridges form important elements for orientation in urban space. Presenting them impressively in turn enables good orientation. Projectors with accent light set strong contrasts in the night-time context.

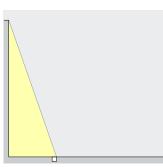

floodlights and wallwashers

Light for urban life

Giving passers-by a feeling of safety and security in urban environments is one of the central guiding principles of master plans. Long wall surfaces, columns and trees can be floodlit with ERCO projectors with high levels of uniformity.

Effective illumination of landmarks

The attractive illumination of historical buildings, memorials and special objects attracts attention and also serves to promote tourism. Wallwashing is one of the most suitable methods of lighting for displaying such attractions.

Projectors, floodlights and wallwashers p.194

Recessed floor luminaires p.256

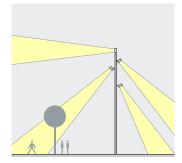

Glare along with light that is too bright, negatively affect the night-time atmosphere. Frequently, low illuminances of about 10lx on squares are sufficient for good orientation. Dimmable ERCO luminaires confidently take on this task.

Projectors, floodlights and wallwashers p.194

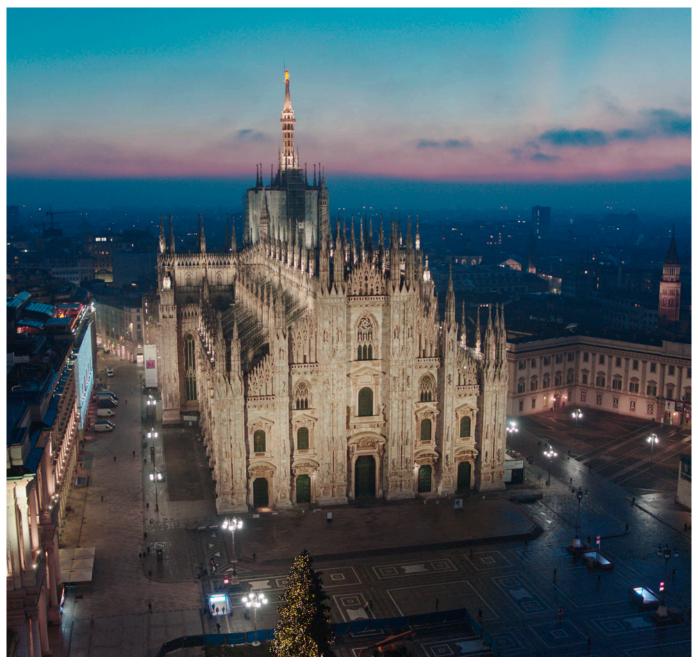

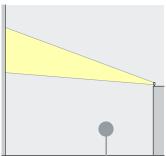

Contemplation – Indoor and outdoor luminaires for religious buildings

Versatile luminaires from ERCO are ideal for emphasising the facades of religious buildings in towns and cities and for atmospherically presenting contemplative spaces. In all religions, light is not only a design tool for architecture, but also a distinctive symbol of the divine. Light in sacred places creates a contemplative atmosphere for meetings between believers.

Whether in churches, mosques, temples or synagogues – light accents help to guide the view onto the essentials.

www.erco.com/contemplation

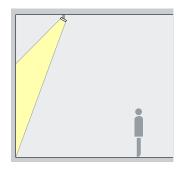

floodlights and wallwashers

Iuminairesp.212

Outdoors: emphasising symbolic power

Sacred architecture translates the beliefs and importance of a religion into a physical structure light enhances this message. The scale of monumental buildings can be emphasised with ERCO projectors, the precise light distri-butions of which effectively highlight facades.

Directing the view with light

Religious buildings touch people through their contemplative spatial atmosphere. Flood distributions in combination with contour spotlights direct the view to the essential elements in the space.

Luminaires for track p.38

Luminaires for track p.38

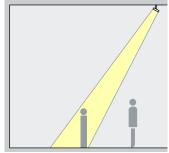

Light from a large distance

Light accents create hierarchies of perception. To illuminate precisely from a large distance, luminaires with accurately defined narrow light beams, without spill light, are required.

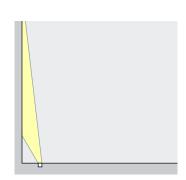

Luminaires for track p.38

Living - indoor and outdoor luminaires for living spaces

Ranging from living rooms and dining rooms to gardens with greenery and paths, a cosy atmosphere can be created with light. ERCO lighting solutions blend harmoniously into different surroundings. Wallwashers and downlights with compact dimensions create sufficient space for living across in surroundings. living, even in small rooms. Light scenes combine ambient lighting with accents and architectural lighting and decorative lumi-naires harmonise to create light for well-being.

www.erco.com/living

Attractively illuminating outdoor areas

Light transforms gardens and patios into an experience in the evening hours. ERCO luminaires with narrow light distributions create focal points for high quality environments at night.

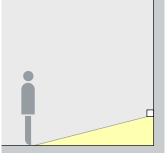

Projectors, floodlights and wallwashers

Recessed floor luminaires p.256

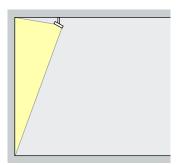

Facade luminaires p.212

Recessed floor **luminaires** p.256

Luminaires for track p.38

Correctly illuminating living spaces

Uniform wallwashing achieves a generous spatial impression. ERCO luminaires with narrow distributions create focal points and structure room zones.

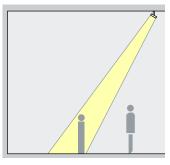

Luminaires for track p.38

Recessed spotlights, floodlights and wallwashers p.82

Recessed luminaires p.98

Shop – indoor and outdoor luminaires for the world of shopping

Impressive facade lighting and shop window lighting as well as attractive product displays contribute to the success of shops. Light not only showcases the products, but also determines the atmosphere, and therefore strengthens the direct shopping experience. Light is presented in seductive or tempting ways according to the season to arouse new emotions with regard to merchandise. The unique presentation of the space and its products with the use of light provides an essential component in its dialogue with customers.

www.erco.com/shop

Creating a presence outdoors

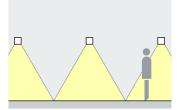

Illuminated facades create attention and separate the important from the unimportant. Grazing light for example provides the exteriors of shops with a prestigious appearance.

Facade luminaires

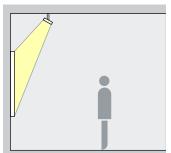

Projectors, floodlights and wallwashers p.194

Attracting the eye to the shop window

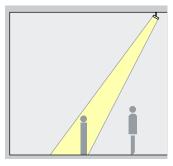

Shop windows create attention and curiosity. With high-contrast accent lighting you can effectively highlight merchandise and thus direct the attention of customers to your shop.

Luminaires for track p.38

Creating shopping experiences with light

By using various illuminance levels and light distributions a visual hierarchy is created, products are placed in the foreground and customers are specifically guided through the store.

Luminaires for track p.38

Recessed spotlights, floodlights and wallwashers p.82

Recessed luminaires p.98

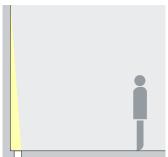

Hospitality – indoor and outdoor luminaires for hotels and restaurants

Welcoming guests with light begins with exterior path and facade lighting and extends to a private ambience at the table or in the hotel room. Whether it's boutique hotels, themed restaurants or temporary bars: ERCO provides architectural lighting solutions with a diversity of scenographic options for room situations that convey enjoyment and pleasure.

Find out more: www.erco.com/hospitality

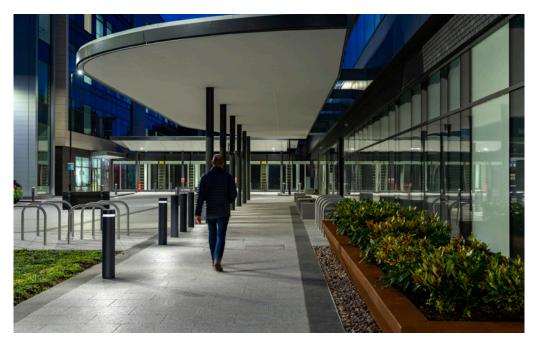

Projectors, floodlights and wallwashers

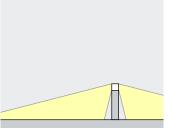

Recessed floor luminaires

Illuminating facades and paths

Effective lighting concepts promote the corporate identity of a hotel or restaurant. Elegantly illuminated paths and routes and accentuated facades create a high quality appeal and a warm welcome for your guests.

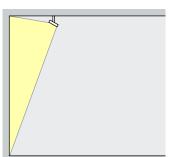

Bollard luminaires p.228

Luminaires for track p.38

Recessed luminaires p.98

Welcoming with light

Simple orientation and a pleasant atmosphere form the basis for the first encounter. Vertical lighting helps to intuitively understand the function of a room and communicates an open sense of welcome.

Enjoying food in good light

Whether it's local cuisine or inspired by far away countries – brilliance significantly contributes to the enjoyment of fine foods. ERCO luminaires with precise, narrow light beams create lustre with high visual comfort for your guests.

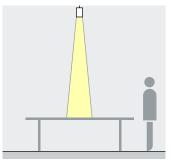

Luminaires for track p.38

Recessed spotlights, floodlights and wallwashers p.82

Indoor

ERCO's range of indoor luminaires embraces a wide spectrum of different lighting tools: spotlights and wallwashers, track and light structures, recessed luminaires, ceiling washlights and floor washlights. They all share a common guiding design principle of efficient visual comfort.

www.erco.com/indoor

Variable. 48V and 220-240V. ERCO track and light structures

Since the invention of the incandescent lamp, no product has revolutionised lighting design as much as the track. It is only track that releases light and luminaires from the constraints of fixed installation. It forms the basis for variable, flexible lighting design that can be oriented to the changing design and use of a room. ERCO offers Minirall track for 48V and track for 220-240V mains voltage. The

range also includes appropriate light structures for indirect lighting and higher load-bearing requirements.

Track for all applications

Minirail 48V track forms the supply unit for miniaturised low-voltage spotlights. ERCO track with high-voltage supply energy for conventional spotlights and other luminaires operated via adapters or sockets in the track. Special Hi-trac track is suitable for higher load requirements.

Proven and future-proof

Track and light structures from ERCO have been in use around the globe for decades. A great plus: new spotlights mechanically fit into existing installations and luminaires already in operation can be used in new installations.

Miniaturised track profile

Minirail 48V track combines maximum flexibility with minimum profile dimensions. It blends elegantly into the architecture and forms the basis for versatile lighting concepts.

Spacing of up to 4m

Hi-trac provides a structurally very powerful infrastructure with widely spaced suspension points – also perfect for the diffuse illumination of ceilings.

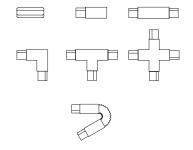

ERCO 220V-240V track

Hi-trac 220V-240V track and light structure

ERCO individual

You have a coloured ceiling? With our "ERCO individual" service we offer you extensive options for individualising your track – e.g. coatings in your desired colour.

www.erco.com/individual

Extending standards with accessories

Whether sensors, displays hooks or safety sockets: adapt the track infrastructure to your individual needs.

Straight ahead and around the corner

Corner-, cross-, T- and flexible connectors enable track installations to have diverse geometries.

ERCO Minirail 48V track and singlets – Small cross section, large flexibility

The elegant infrastructure for lighting in the digital age With Minirail, ERCO offers a miniaturised track as the basis for flexible, space-saving lighting installations. The 48V system requires only two conductors and has a profile with a width of just 22mm. Ideal for all situations where system dimensions need to be as compact as possible. In combination with compact luminaires for Minirail, lighting designers can install high quality lighting in the smallest of spaces. Minirail is suitable for ceiling surface-mounting and, with appropriate accessories,

for ceiling-recessed and suspended mounting. A wide range of configurations can be created with the connectors, couplers and live ends.

ERCO track and singlets – Supporting role

ERCO track deliver the energy required to light up rooms

ERCO track is more than a power source. The system provides a flexible infrastructure for luminaires, DALI or standard, that can move with your changing requirements. Track are the anchor for your lighting concept and are primarily designed for mounting on ceilings or walls, whereas the flanged track is designed for suspended ceilings or flush mounted using a plaster trim profile. Individual track lengths can be connected with each other so as to form rectangular and other shapes.

Work, Community

This distinguishes our luminaires for track

You can find the right size and lumen package for any light effect and room height, whether for small boutiques or prestigious museum foyers – with Minirail 48V or 3-phase track as the infrastructure.

Up above. Down below. Right. Left.

Design freely – on ceilings, walls or beams. Mount and move spotlights in the track without tools.

Infinitely variable light distribution

Zoom spotlights set small, medium or large accents. And they can be infinitely adjusted for any size in between.

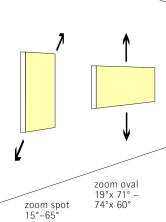

Precision in all facets

Spherolit or Darklight technology: our optics project light without spill light for maximum illuminances on the target surface.

> double wallwash

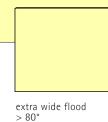

wallwash

oval flood approx. 20°x 60°

Change the light distribution yourself

Whatever you wish to illuminate, with ERCO you'll find the right light distribution. If the interior changes you can simply replace the light distribution – from accent lighting to wallwashing.

Luminaires for high rooms

ERCO offers luminaires with up to 9840 lumens for lighting from wide distances. Thanks to their durability they're perfect for installing in hard-to-access locations.

Customise

"ERCO individual" offers extensive options for the individualisation of product ranges: erco.com/individual

Extending standards with accessories

Conversion filters, honeycomb anti-dazzle screens and barn doors – adapt luminaires to special requirements.

Visual comfort in the office

Especially for flexible, standard-compliant office lighting: downlights for track with UGR<19.

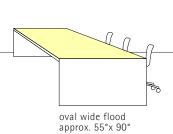

Staging with colour

Adjust the colour temperature dynamically or illuminate in colour. Luminaires with tunable white or RGBW allow scenographic lighting concepts.

Light for art and art appreciation

LEDs with excellent quality of light show your art in optimal colours. The light of our luminaires with DALI, Casambi Bluetooth and Zigbee control gear is flicker-free – also through the lens of your camera.

Connectivity

Wireless or wired? With technologies such as Casambi Bluetooth, Zigbee and DALI we always offer you the right interface. Some luminaires offer interchangeable plug-on control in the form of an add-on control unit.

Eclipse 48V – The art of illuminating

One spotlight system and 28,000 possibilities: with interchangeable darklight lenses and Minirail adapters

Minirail adapters
Eclipse offers high-end technology,
maximum visual comfort and a system scope for all applications – for
example in museums and galleries
but also for exclusive retail projects.
Interchangeable lens units define
the light distributions – also as
zoom spotlights and contour spotlights. With only one light point
and an almost invisible beam path,
the new Darklight lenses create a
magical appearance. Refine with
accessories: conversion filters cre-

ate additional spectra and tunable white and RGBW are available for dynamic scenes. The compact Eclipse luminaires ideally match the Minirail track. Modern connectivity such as Casambi Bluetooth, Zigbee and DALI via gateway round off Eclipse 48V.

Parscan 48V – Systematic diversity

The compact 48V spotlight system for galleries and boutique offices

The evolution of Parscan brings a broad technical platform for even more quality of light, design flexibility and digital connectivity. A new generation of Spherolit lenses projects the light onto the target plane – precisely, uniformly and with superior efficiency. Miniaturised 48V technology reduces the dimensions of luminaires, track and adapters and enables maximum optical performance even from size XS. The support bracket integrates flush into the overall

cylindrical shape: a timeless, minimalist design for projects such as galleries, boutique offices and the illumination of display cases. Parscan spotlights can be customised to suit the specific installation situation thanks to tool-free interchangeable lens units, a wide range of accessories and add-on control units.

Eclipse OnTrack – The art of illuminating

One spotlight system and 28,000 possibilities: with interchangeable darklight lenses and reliable transadanters

reliable transadapters
Eclipse offers high-end technology,
maximum visual comfort and a system scope for all applications – for
example in museums and galleries
but also for exclusive retail projects.
Interchangeable lens units define
the light distributions – also as
zoom spotlights and contour spotlights. With only one light point
and an almost invisible beam path,
the new Darklight lenses create a
magical appearance. Refine with
accessories: conversion filters cre-

ate additional spectra and tunable white and RGBW are available for dynamic scenes. With three sizes and the transadapter, Eclipse fits ideally into existing installations. The connectivity is equally well thought-out: for example with DALI or on-board Dim.

Parscan InTrack – Systematic diversity

The multifunctional spotlight system for museums and foyers with flush track adapter

The evolution of Parscan brings a broad technical platform for even more quality of light, design flexibility and digital connectivity. A new generation of Spherolit lenses projects the light onto the target plane – precisely, uniformly and with superior efficiency. Miniaturised technology enables maximum optical performance even from size XS. The elegant Intrack adapter disappears into the track and the support bracket integrates flush into the overall cylindrical shape:

a timeless, minimalist design for projects such as museums, foyers or sacred spaces. Parscan spotlights can be customised to suit the specific installation situation thanks to tool-free interchangeable lens units, a wide range of accessories and add-on control units.

Parscan - Systematic diversity

The elegant and universal spotlight system for museums and shops

Light, not luminaires – this is the foundation on which the sleek, cylindrical shape of Parscan is modelled. Different lighting solutions can be implemented efficiently thanks to precise and flexible photometrics. If the spotlight is directed vertically downwards as a downlight, the support bracket merges into the cylindrical shape. With its black housing, compact shape and a luminaire head that barely swivels out when rotated or tilted, the Parscan is also ideal for

mounting in ceiling channels. The excellent glare control enhances visual comfort even in challenging lighting situations. Displaying a minimalist design, the luminaire appears unobtrusive in museums, shops or places of worship.

Oseris - The pivotal feature

Compact, versatile spotlights with characteristic semi-spherical joint

The swivel joint of Oseris spotlights is an ingenious design idea. The swivel joint is bevelled flush against the semi-spherical luminaire head and allows very precise alignments even if there is little freedom of movement in ceiling channels. Diverse light distributions, different sizes and various wattages create wide flexibility for nuanced lighting concepts. Snoots are available as accessories for special glare control needs. Thus Oseris spotlights are an exceptionally versatile lighting tool

for retail, museums and high-end living spaces.

Stella - For high rooms and high demands

High output, efficient and precise accent lighting
High lumen-output luminaires
are needed for large lighting distances and high rooms – e.g. for
displaying large sculptures in the foyer of a museum or for uniform wallwashing in an airport. Stella are precisely these high output spotlights, floodlights and wallwashers for track. The Stella range consists of two sizes and all light distributions within the ERCÖ system of luminaires generated by highly efficient Spherolit lens optics. As a result, complex lighting tasks can be flexibly and

consistently resolved. The simple technical design of the cast aluminium housing ensures optimum heat management and thus a long service life.

Opton – The lighting tool for shop lighting

Flexible and low-cost illumination for salesrooms

Opton is ideal for shop windows and salesrooms thanks to a particularly low height and a high luminous flux. ERCO achieves this with the intelligent positioning of control gear and luminaire head. The cast aluminium luminaire head ensures a long life thanks to sophisticated thermal management. In combination with efficient photometrics, Opton allows for highly economical and energy-efficient illumination. Variable distribution options further ensure flexible lighting solutions without compromising on the light quality. Opton – the ideal tool for shop lighting.

Logotec – The multi tool for lighting design

Compact luminaires for economic accent lighting, flood-lighting and wallwashing in salesrooms

Brightness contrasts direct the view of the customer in the shop and highlight the appeal of the products on offer. This is the domain of Logotec. System design is on a par with energy efficiency. Mounted flexibly on track, this spotlight efficiently accentuates clothing, jewellery or foodstuffs. Thanks to interchangeable lenses, it even masters alternative tasks just as comfortably – the floodlighting

of large objects or the uniform illumination of walls or shelving. As a characteristic aspect, the Logotec features a flat design thanks to highly efficient LED photometrics.

Pantrac – Lighting effects for walls

Simple and efficient wallwashing for museums and business premises

premises
Pantrac exceeds the demands of the ultimate challenge in lighting design: perfect wallwashing. The system is designed to achieve superb uniform illumination of walls, product shelving or exhibits with total visual comfort. Innovative photometrics optimise its efficiency and, as a result, reduce the number of luminaires required, as these can be spaced further apart.

With its archetypal cubic design, the luminaire integrates as effort-

lessly with modern rooms as with historic architecture. A very wide dimming control range of 1% to 100% supports aesthetic and conservation aspects of artwork protection and gallery appearance.

Skim – Downlights as flexible as spotlights

Cost-effectiveness, efficiency and visual comfort for dynamic work environments.

Skim luminaires for track combine the flexibility of spotlights with the visual comfort of downlights in an unusual product design. This makes them ideal for work environments which are frequently reorganised. The arrangement and alignment of Skim luminaires on track can be adapted at any time to modified office layouts. Different wattages, light distributions and control types offer new design possibilities – in offices, retail projects and public buildings.

ERCO

Jilly – The versatile light for modern work

Highly efficient and standardcompliant office workplace lighting - with track as a flexible hasis

basis.
In keeping with modern, dynamic working environments in which office layouts are constantly changing and adapting, Jilly achieves the efficient and standard-compliant lighting of workplaces. The flat housing and a striking antidazzle louvre characterise the elegant appearance. Jilly's lighting technology combines a highly efficient lens system with an antidazzle louvre for visual comfort and luminous efficacy at the same

high level. The wattage and light distribution enable wide luminaire spacing for economical lighting concepts that comply to standards. Track mounting means that Jilly can be optimally aligned – always according to the arrangement of the workstations.

Compar – The flexible path to perfect light

An adaptable, compact tool for ergonomic light in offices

Illuminating office architecture and workplaces in a nuanced and extremely flexible way – made possible by the combination of Compar luminaires and track as the infrastructure. As downlights for track, they utilise the lighting technology of the Compar range. With their flat housing they are also suitable for rooms with low ceiling heights. With its anti-glare louvre Compar offers a high level of visual comfort, and workplaces are illuminated according to standards with the appropriate light distributions.

Compar can always be optimally aligned even with changing office layouts due to installation via track adapters. The wattage and light distribution of Compar enable wide luminaire spacing for economical lighting concepts.

Individual dimensions possible

Ideal for recessed spotlights

Insertion plates for luminaires available

Shop

This distinguishes our recessed spotlights, floodlights and wallwashers

Predestined for ceiling channels

Thanks to their compact design and central pivot point, some luminaires are ideal for on-site ceiling channels and for the ERCO ceiling channel system.

Pan. Tilt. Rotate.

You'd like to precisely align your light beams? Recessed spotlights with cardanic suspension can be panned and tilted with precision.

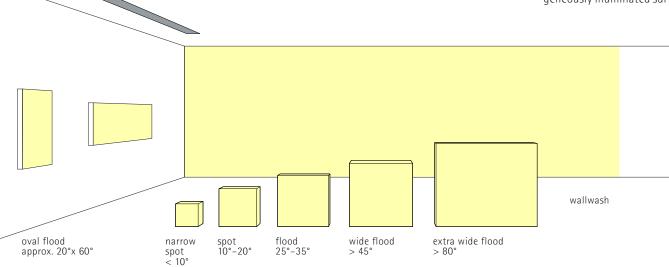

Round or square

The system design of ERCO recessed luminaires offers almost any light distribution – thanks to lens technology that's independent of the luminaire geometry.

Powerful light

Our optics project light without spill light for maximum illuminances on the target surface. The appearance ranges from individual LED dots to a homogeneously illuminated surface.

Change the light distribution yourself

Whatever you wish to illuminate, with ERCO you'll find the right light distribution. If the interior changes you can simply replace the light distribution – from accent lighting to wallwashing.

Maximising visual comfort with accessories

Recessed spotlights from ERCO feature outstanding visual comfort. Snoots, hexagonal baffles and cross baffles are the right choice if in individual situations you wish to further reduce views into the luminaires.

From small to large

Find the right size and lumen package for any light effect and room height – from boutiques to museum foyers.

Space-saving in the ceiling

In tight installation situations every millimetre is critical. Just 70mm is sufficient for especially flat recessed luminaires.

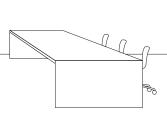

Perfectly integrated

With recessed ceiling cassette, the pivoted luminaire head does not protrude beyond the lower edge of the ceiling – perfectly integrated for a simple ceiling appearance.

Light for art and art appreciation

LEDs with excellent quality of light show your art in optimal colours. The light of our luminaires with in-house developed control gear is flicker-free, also through the lens of your camera.

Connectivity

Wireless or wired? With technologies such as Casambi Bluetooth and DALI we always offer you the right interface.

Quintessence round – Elegant accentuation and floodlighting

Round recessed spotlights and recessed floodlights for prestigious areas, exhibitions and salesrooms

The Quintessence round recessed spotlights help you expertly accentuate individual areas or objects. The recessed floodlights, meanwhile, direct the attention of the observer onto your shelves and product tables. The luminaires integrate elegantly with the room architecture, their large swivel range enables you to reach even far corners of the room. The Quintessence system design facilitates a flexible lighting

concept as a unified whole. Combine spotlights and floodlights with each other or with the Quintessence downlights. Select the appropriate mounting details and lamps. Whatever your choice, the result is always a highly efficient lighting system meeting the highest standards of light quality.

Starpoint – Filigree powerhouse for accent lighting and washlighting

Recessed spotlights for salesrooms, hotels, restaurants and homes

Behind the discreet ceiling opening of the Starpoint recessed spotlight lies a master of floodlighting and accenting. Despite its compact design, six different light distributions are available. This enables the interiors of sales areas, restaurants, hotel rooms and living rooms to be eye-catchingly presented in diverse ways. According to its various design solutions, covered and flush mounting options are available.

Gimbal - Cardanically adjustable

Recessed spotlight with a compact high-precision swivel mechanism

Gimbal suspension is widely prevalent in technology and is a concept that is as old as Leonardo da Vinci, who suggested its use for nautical compasses. In lighting technology, gimbals are an elegant solution for pinpoint adjustment of the luminaires. Gimbal recessed spotlights transform this principle into the era of digital lighting – with a highly precise and convenient swivel mechanism in a compact design that stands apart from conventional approaches and enables

shallow recess depths. Different sizes and wattages for the full spectrum of light distributions make Gimbal ideal as a system for differentiated lighting design with focus on the high-contrast presentation of objects. With its unique technoid appearance in the ceiling, Gimbal lends itself perfectly to retail projects as well as to museums and other public buildings.

Gimbal with mounting bracket -The highly diverse special tool

Versatile lighting technology with cardanic suspension, optimised for mounting in channels
The principle of cardanic suspension with Gimbal recessed
spotlights translates in the lamber of t cially precise, comfortable swivel mechanism. This is not only more compact than standard versions, but the centre of the luminaire head maintains its position during alignment – as a result Gimbal is ideal for lighting concepts with ceiling channels. The luminaire can also be simply installed in onsite ceiling channels thanks to its special mounting bracket. Several

sizes and wattages for any light distribution allow for flexible lighting concepts. Applications consist of retail projects, hotels and restaurants as well as buildings where lighting designers plan discreet and effective lighting from ceiling channels or coves.

ERCO ceiling channel system

The ERCO ceiling channel system provides a versatile infrastructure for shop lighting purposes. Its linear design structures the space and simultaneously achieves a concise, clean ceiling appearance that places the focus on the display of products with light. With recessed luminaires, recessed spotlights and spotlights adapted to the system from the track portfolio, all tools are available for rich-contrast accenting,

uniform wallwashing and efficient general lighting. Create your own individual ERCO ceiling channel system together with your ERCO lighting consultant.

Simply contact us: www.erco.com/contact

Integrated. Versatile. Recessed luminaires

With recessed luminaires the luminaire is completely subordinate to its lighting effect. The lighting tools are hardly noticed as an additional element of design, being fully integrated into the architecture. The building and its spaces within reveal themselves in an interplay of surfaces and in an interplay of surfaces and light – light with outstanding visual comfort that covers the entire spectrum from accentuating beams of light to wallwashing.

Round, square or linear

The design of ERCO recessed luminaires offers almost any light distribution – thanks to lens technology that's independent of the luminaire geometry.

Luminaires for high rooms

Precise illumination in high rooms with up to 10,000lm: ERCO LED downlights offer high illuminances and outstanding visual comfort.

This distinguishes our recessed luminaires

Tunable white technology

Just as the outdoor colour temperature changes during the day, the colour temperature of lighting indoors can be adjusted to support lighting concepts for Human Centric Lighting for example.

wallwash

wide flood > 45° extra wide flood > 80° oval flood approx. 20°x 60°

double wallwash

Safe is safe

Recessed luminaires with IEC/EN certification are suitable for emergency lighting.

Wallwashing in all its facets

ERCO wallwashers are the specialists for vertical lighting with wall heights of 8m and more: ranging from uniform wallwashing in foyers and highly attractive grazing light on structured walls to precise double wallwashing in corridors.

Extremely durable

Due to their excellent maintenance of luminous flux, ERCO luminaires feature high investment security: L90/B10 with up to 50,000 operating hours. At 9 hours a day, this means over 15 years of low-maintenance operation with outstanding photometric characteristics - ideal for difficult-toaccess installation locations.

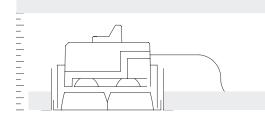

Setting magical accents with directional spotlights

Directional spotlights blend almost invisibly into the architecture. They combine the appearance of a downlight with the adjustment capability of a spotlight.

Shallow recess depth

In tight installation situations every millimetre is decisive. Just 75mm is sufficient for especially flat recessed luminaires.

Very high visual comfort

Darklight reflectors or anti-dazzle louvres: both enable standardcompliant office lighting with UGR<19.

Customise

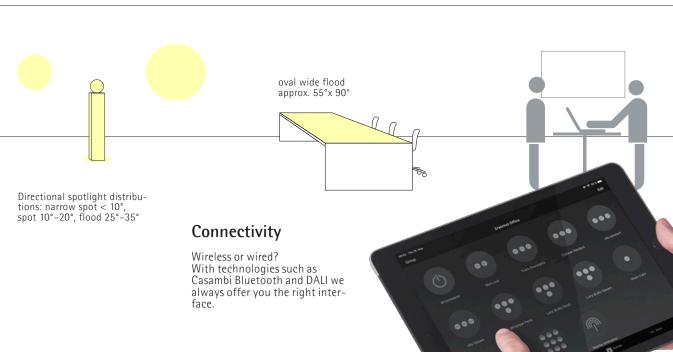

"ERCO individual" offers extensive options for the individualisation of product ranges: www.erco.com/individual

Light for video meetings

The light of our luminaires with in-house developed driver is flicker-free and therefore ideal for video conferences in offices or meeting rooms.

Quintessence Pinhole – Pinpoint accentuation

Minimalist, precise directional spotlights for brilliant effects in the shop

Ouintessence Pinhole directional spotlights confidently accent individual objects in the shop. Only a small light emission aperture can be seen in the ceiling. The luminaire therefore blends elegantly into the ceiling and almost disappears as merely a technical detail. The linear opening allows the luminaire head to be swivelled in the ceiling. A supplementary rotary mechanism also enables precise alignment. Quintessence Pinhole directional spotlights epitomise

the approach of 'light instead of luminaire' to guide the attention of the customer.

Starpoint - Filigree and efficient

Recessed luminaires for salesrooms, hotels, restaurants and homes

Integrated unobtrusively as a filigree light source into the ceiling, the downlight of the Starpoint range provides efficient ambient lighting. Using the wide light distribution, it illuminates large areas, whereas the oval version marks out pathways. The shallow recess depth of the luminaire makes for a very discreet appearance that proves an optimal fit in the home. The lumen package of Starpoint downlights lends itself particularly for use in hotel rooms or homes. With

covered or flush mounting detail, the luminaire caters to different design solutions.

Iku - Efficient, economical, universal

Downlights and wallwashers for architectural lighting

Five sizes and five light distributions enable perfect, economical lighting for applications of all dimensions: in large public buildings, offices and conference centres, but also in smaller rooms in the restaurant and hotel sector. lku enables large luminaire spacing with wide light distributions thanks to oval light beams. Iku wallwashers and double wallwashers enhance rooms and corridors with visual width and increase the impression of brightness. Iku is characterised by high luminous

efficacy and a long service life. The combination of tunable white, different light distributions and modern connectivity creates light-ing in the sense of Human Centric Lighting.

Iku Work - Efficient, economical and standard compliant

Downlights for office workplace lighting Iku Work is the ideal downlight for

standard-compliant, zonal lighting of office workstations. Iku Work also features oval wide flood light distribution with UGR<19 especially for rows of workstations. The wide flood distribution uniformly illuminates individual desks. Simple installation, high luminous efficacy and the long service life of the recessed downlights are winning factors in terms of cost efficiency. For office concepts in the sense of Human Centric Lighting, the combination of Iku Work stand-

ard-compliant downlights with wallwashers from the Iku product range is ideal. In this way, highly attractive atmospheres in offices are created through vertical light-

Skim – Lighting design for any architecture

The low-cost recessed luminaire for office and general lighting Skim combines an attractive appearance with high quality of light and an excellent price-performance ratio. Ideal for offices, foyers and circulation zones as well as in retail, or the hotel industry. Several sizes, wattages and light distributions make Skim an attractive alternative to conventional luminaires. The lens system not only scores with a magical appearance, but also with high efficiency, uniformity and good visual comfort. Depending on the projected light distribution, Skim either

provides particularly economical general lighting with large luminaire spacing or is ideal as standardcompliant task lighting.

Compact - Efficient and economical

The combination of visual comfort and recess depth is unique. Compact combines good visual comfort with a particularly low recess depth. The various light distributions, e.g. extra wide flood and oval flood, enable a wide range of uses in offices and administration as well as in sales areas. The unique oval flood distribution is especially suitable for illuminating circulation zones. Even generous and uniform illumination of vertical surfaces is possible with wallwashers. This means that creative lighting

designers also have nuanced lighting tools at their disposal in the

area of compact downlights for efficient visual comfort.

Pragmatic. Convincing. Surface-mounted luminaires

Very pragmatic considerations often lead to the use of surface-mounted downlights – for example when the space required for recessing conventional downlights is not available in the ceiling. The decision in favour of a lighting concept with surface-mounted downlights considerably reduces the installation complexity, for example in solid ceilings or in existing buildings.

Flood 25° - 35° Wide flood >45°

Extra wide flood

Always the right light distribution

Whatever you wish to illuminate, with ERCO you'll find the right light distribution. From wide beam floodlighting to the efficient illumination of workstations.

Shallow construction heights

Flat luminaires are discreet and place the focus on the light itself. Low installed heights are particularly useful in low rooms.

Various housing colours

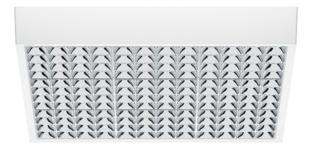

Luminaires are available in different colour versions for matching the luminaire colour to the surroundings.

Customise

"ERCO individual" offers extensive options for customising the product ranges: erco.com/individual: www.erco.com/individual

Various sizes

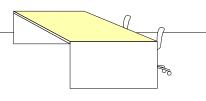

The luminaires in the ERCO product range cover a wide variety of lumen categories and therefore offer appropriate solutions for a wide variety of lighting tasks.

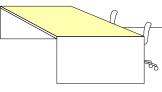

Anti-glare louvres for optimum visual comfort

Anti-glare louvres limit the view into the luminaire and enable high visual comfort even at a beam angle of 90°.

Oval wide flood approx. 55°x 90°

Suitable for office workstations

ERCO develops luminaires aimed at good glare control and high visual comfort. UGR values are used as support for purely norm-referenced lighting. This should not be carried out using 'blanket' values, but should be implemented according to the individual arrangement of luminaires in the room.

Quintessence round - The system solution for excellent visual comfort

The surface-mounted luminaire for uniform light with large luminaire spacing

As a surface-mounted version, Quintessence becomes an aesthetic architectural feature with the photometric properties of a downlight. Quintessence surface-mounted luminaires are designed with integrated control gear, making them ideal for use in rooms with ceilings that do not permit recessed lumin-aires. Following the system design of its range, surface-mounted luminaires offer the same sizes and lumen packages as recessed downlights. With an emission angle of

90° and a 40° cut-off, Quintessence meets the challenges of efficient ambient lighting masterfully whilst achieving high cylindrical illumin-ances. Its exceptionally wide beam enables large luminaire spacing with highly uniform illuminance distribution - and excellent glare

Design and application: www.erco.com/atrium-df-s

Starpoint – Striking light cylinder for efficient illumination

Surface-mounted luminaires for in the ceiling – ideal for hotels, bars **hotels, bars and restaurants** and restaurants. A chrome version

The Starpoint surface-mounted downlight combines the design principles of "ambient luminescence" and "play of brilliants" coined by Richard Kelly. The light beam provides efficient ambient lighting. Using the wide light distribution, it illuminates large areas, whereas the oval version marks out pathways. The luminaire cover with its strikingly illuminated ring creates an effective eye-catcher. The translucent element, which is visible only when illuminated, makes for a subtle decorative detail

in the ceiling – ideal for hotels, bars and restaurants. A chrome version adds a touch of mid-century glamour and lends itself to combination with rough materials such as wood or natural stone, thereby creating a compelling contrast.

Skim – Lighting design for any architecture

Skim as an independent, flat surface-mounted luminaire ERCO has developed the Skim surface-mounted luminaire for situations where ceiling architecture does not allow the installation of recessed downlights. The same lens system is used here as for Skim recessed luminaires. With efficiency and visual comfort, diverse light distributions and available in two sizes, the luminaire is suitable for a variety of applications: for example offices, shops and public buildings. Surface-mounted luminaires are the straightforward lighting solution especially in new,

energy-efficient buildings with solid concrete ceilings. Details such as securing the luminaire with snap hooks or optional spacers for surface-mounting make mounting easier

Compar square – The simple path to perfect light

Compact surface-mounted luminaires with versatile, high quality lighting technology High quality surface-mounted luminaires are the right choice in rooms with solid ceilings and also for simple modernisation purposes. Compar surface-mounted luminaires are available for office spaces and many other applications in administration or public buildings. With their flat, compact housing they blend elegantly into the architecture. Three wattages and different light distributions allow nuanced lighting concepts for low to high rooms. Compar is

optimised for office workplaces with high visual comfort, and also improves levels of cost efficiency in circulation zones and foyers due to large luminaire spacing.

Succinct. Versatile. Pendant luminaires

Pendant luminaires provide eco-nomical general lighting with a high level of visual comfort and are often used when room zones or focal points are highlighted by light, but also if these are to be marked as architectural elements by the luminaires themselves. Pendant luminaires with tunable white additionally support

lighting concepts such as Human Centric Lighting, for example for use in offices.

The translucent ring with Starpoint creates a magical light

Very high visual comfort

Anti-glare louvres enable standard-compliant office lighting with UGR<19.

High rooms

Particularly high rooms such as airport terminals and concert halls demand high-lumen output luminaires. With pendant luminaires up to 9840 lumens, you can illuminate efficiently and with high visual comfort even from very large distances.

Dimming

stations.

In-house developed control gear enables uniform operating behaviour of luminaire groups and dimming down to 1% – important for use as hall lighting in cinemas, theatres and concert auditoriums. With DALI control, the dimming value is as low as 0.1%.

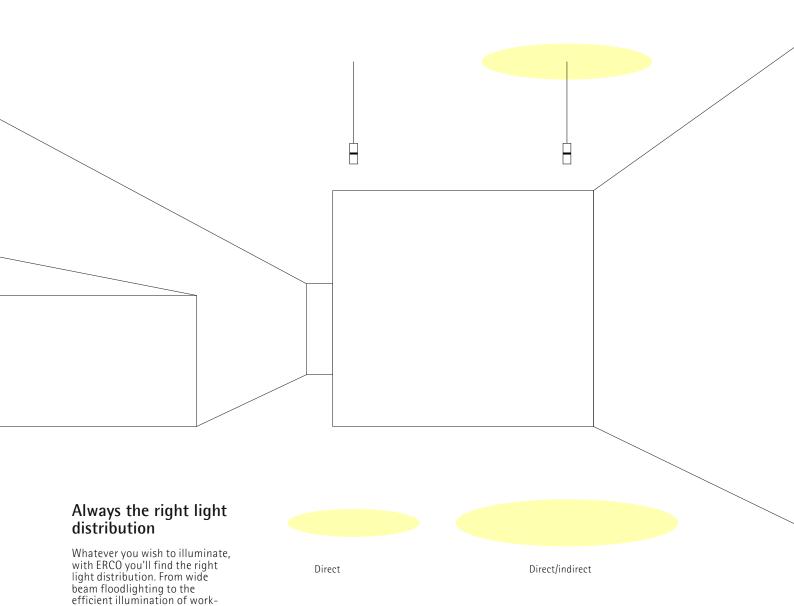

Integrated uplight

If light should also display and highlight the ceiling, Atrium double focus pendant luminaires provide new options. The integrated uplight particularly accentuates the dimension of high rooms.

Customise

"ERCO individual" offers extensive options for the customising of product ranges: www.erco.com/individual

Quintessence round - The system solution for excellent visual comfort

The lighting tool for customised light point heights and large luminaire spacing

With Quintessence pendant luminaires, the mounting height can be individually set in relation to the architecture and its use. Its simple shape provides visual accents in historical as well as contemporary architecture. In addition to mounting with a canopy, Quintessence pendant luminaires can be moun-ted in track for flexible positioning. With a beam angle of 90° and 40° cut-off, Quintessence pendant luminaires are the ideal lighting tool for general lighting with high

cylindrical illuminance levels and large luminaire spacings.

Pantrac – Lighting effects for ceilings

This ceiling washlight makes the task of creating uniform uplighting incredibly easy Pantrac wall-mounted luminaires focus on adding lighting effects to ceilings. The luminaires bring out the support structure and lend rooms a higher appearance. Ceilings decorated with stucco and paintings are given a new dimension. Pantrac blends into its architectural surroundings. The archetypal cubic design remains unobtrusive letting the luminaire recede into the background. The luminaire is available in different sizes with a range of light

distribution patterns. This ensures optimum illumination of the ceiling with a minimum number of luminaires. In this way, Pantrac represents not only an effective, but also a cost-efficient, lighting solution.

Small. Effective. Recessed floor luminaires

Recessed floor luminaires attract attention because the existence of light sources on the ground as well as the direction of light from below to above is unusual and therefore particularly noticeable. They also assume directive lighting tasks, e.g. by marking pathways or highlighting entrances.

www.erco.com/ ground-luminaires

Recessed floor luminaires

Hospitality, Community

Grazing light wallwashers and directional spotlights

Hospitality, Community

Pivotable The luminaires can be adjusted simply and precisely for optimum light beam alignment. The light is thus emitted to precisely where it is required.

Grazing light wallwasher

Grazing light wallwashers create effective light which highlights the texture of surfaces. For precise alignment, the luminaire can be tilted by up to 10° in the housing and locked with a fixing screw.

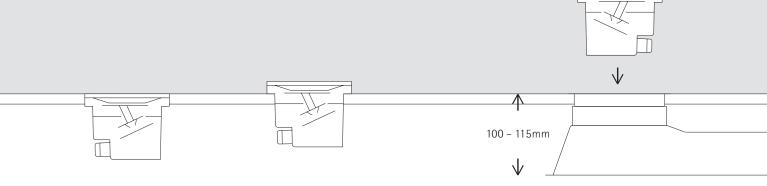

Directional luminaires

Directional luminaires are used for accent lighting on objects or architectural details. They can be flexibly aligned up to an angle of 30° and feature rotationally symmetric light distribution.

This distinguishes our recessed floor luminaires

Flush or covered installation possible

Nadir recessed floor luminaires can be installed with a cover frame to cover the ground cutout or with a flush-ground trim detail.

Shallow recess depth

For compact installation situations, ERCO has developed luminaires with a shallow recess depth that guarantee good quality of light even in confined installation conditions.

Inground housing with tolerances

The height-adjustable frame of the inground housing enables a compensation of dimensional tolerances between the bare floor and the finished floor or in the case of slanting floors. The low recess depth from 100mm enables use in many areas. Even mounting in floating floor screed with sound insulation requirements is easily possible.

Available in round or square

The ERCO system design includes round and square luminaires. The luminaires can thus be adapted to the architecture and the surroundings.

Protection rating IP67

Luminaires with IP67 protection rating are dusttight and protected against the consequences of temporary immersion.

Nadir IP67 round – Elegant down to the last detail

Nadir ensures maximum visual comfort for light from indoor floor areas

Bringing out wall surfaces, effectively illuminating architecture, marking out pathways: Nadir IP67 for indoor applications performs these and other tasks with peerless elegance. In square or round versions and with a discreet stainless steel mounting frame, the luminaire's mounting is virtually flush with the floor. Needless to say, it can also be mounted covering the surrounding cut-out. Nadir IP67 is a highly flexible system, letting you vary the recess

depth to suit the actual floor conditions.

Precision in all facets

Spherolit or darklight technology: our optics project light without spill light for maximum illuminances on the target surface. Noteworthy is that high illuminance is achieved even with small wattages.

This distinguishes our projectors, floodlights and wallwashers

Wallwash

From small to large

You'll find the right size and lumen package for every lighting task: perfect from small gardens to monumental facades.

Up to 10 distributions

Always the right light distribution - from accentuating small details to floodlighting high facades. Flexible distributions such as zoom optics can be infinitely adjusted by yourself. With some luminaires, you can easily change the light distributions.

High visual comfort

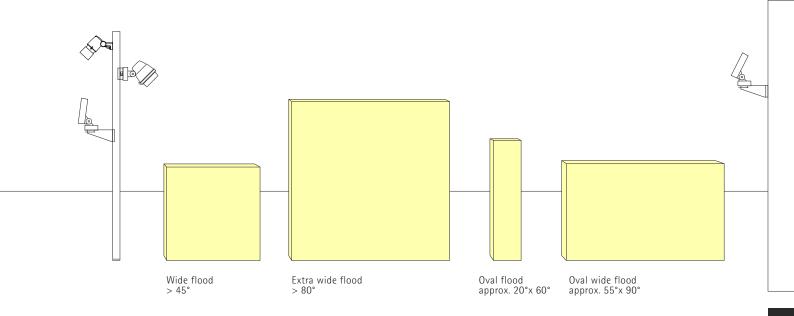

To achieve a particularly high level of visual comfort, ERCO has developed luminaires that ideally shield the light source thanks to their special housing design. Special darklight lenses also ensure perfect glare control.

Mounting in any location

Whether mounted on the ground, to facades or masts – ERCO offers suitable accessories for all mounting situations, e.g. cantilever arms, ground stakes and mast clamps. We offer projectors with corresponding connection threads for mounting to on-site G1/2 threaded holes.

Extending standards with accessories

Adapt luminaires to special requirements with interchangeable lenses and filters.

Extremely durable

Due to their excellent maintenance of luminous flux, ERCO luminaires feature high security of investment: L90/B10 with up to 50,000 operating hours. At 5 hours a day, this means over 25 years of low-maintenance operation with outstanding photometric characteristics – ideal for difficult-to-access mounting locations.

For all types of weather

All ERCO projectors, floodlights and wallwashers have an IP65 protection rating, which means they are dustproof and protected against jets of water from all directions.

Connectivity

Wireless or wired? With technologies such as Casambi Bluetooth, DALI or switchable, we always offer you the right interface

Customise

"ERCO individual" offers extensive options for the individualisation of product ranges: erco.com/individual

Kona XS – Straightforward and compact

The small, sophisticated tool for outdoor lighting

Not every outdoor lighting project requires a powerhouse approach – especially when used in frequently populated urban areas, in parks or around buildings. Kona XS is the smallest outdoor projector in the ERCO range, with a lighting technology reduced to what is essential – brilliant light of the familiar superb quality provided by Spherolit LED lens systems, with a huge range of distribution options. This enables precise and efficient lighting concepts without detracting from the magic of the night. Kona XS adopts the modern, tapered hous-

ing design of its larger cousins in the Kona range, with a smooth yet robust aluminium housing designed for easy installation and maintenance.

Gecko - Powerful light from a virtually invisible source

Glare-free accent lighting, flood- head that can be rotated and tilted lighting and wallwashing in the

outdoor area With its flowing, round silhouette, Gecko enriches gardens and parks with a design element that blends flexibly into any environment. The housing conceals sophisticated photometric features: with a uniform, wide distribution light beam or with crisp accent light, Gecko enables impressive facade displays and other outdoor staging possibilities. The excellent shielding enables illumination from an almost completely concealed light source. Gecko can be adjusted easily and precisely with its luminaire

in all directions; in addition, the maintenance-free LED optoelectronics reduce operating costs.

Beamer New - Maximum visual comfort for the highest demands

Adaptable projectors without spill light that master light and darkness in outdoor spaces Beamer New projectors are precision tools for the most demanding outdoor lighting tasks - technically on a par with the best museum spotlights. With compact and corrosion-free housings, they feature exceptional quality of light, adaptivity and digital connectivity. The light emission of their innovative darklight optics is highly uniform and without spill light. This gives the projectors

maximum visual comfort and a

magical appearance. The circumstances change? Interchangeable optics including zoom and wall-wash adapt to new requirements and filters and lenses serve as accessories for fine tuning. Options such as DALI, wireless dimming via Casambi Bluetooth, Tunable White and RGBW colours transform smart lighting scenarios into reality.

Beamer – Maximum visual comfort for superior standards

Efficient outdoor accentuation and floodlighting in a classic design

Beamer achieves impressive displays of monuments, buildings and vegetation. Protected by an extremely durable housing, the projector allows you to implement nuanced solutions for your lighting tasks. The excellent glare control by the snoot guarantees a high level of visual comfort and ensures that light only reaches where it is needed. The mounting accessories ensure that Beamer can be installed precisely where it is needed. You can always set up the luminaire with repetitive accuracy

thanks to the scale attached to the hinge. The maintenance-free optoelectronics of Beamer save our resources thanks to its high efficiency, and thus reduce operating costs.

Kona - Maximum visual comfort for a wide range of lighting tasks

High luminous flux and maximum visual comfort for lighting tasks in the outdoor area Kona is suitable for illuminating

large buildings and objects. The round, conically-shaped lumin-aire housing provides outstanding visual comfort with very good shielding properties. From focused lighting from a long distance to floodlighting and uniform wallwashing: all is possible. Its high luminous flux makes Kona an ideal lighting tool for large projection distances. The maintenance-free, durable optoelectronics reduce operating costs and also enable operation in difficult-to-access

installation locations. The weatherresistant housing can be precisely aligned thanks to a pan-and-tilt mounting plate. Extensive mounting accessories allow Kona to be installed flexibly.

Universal. Elegant. Facade luminaires

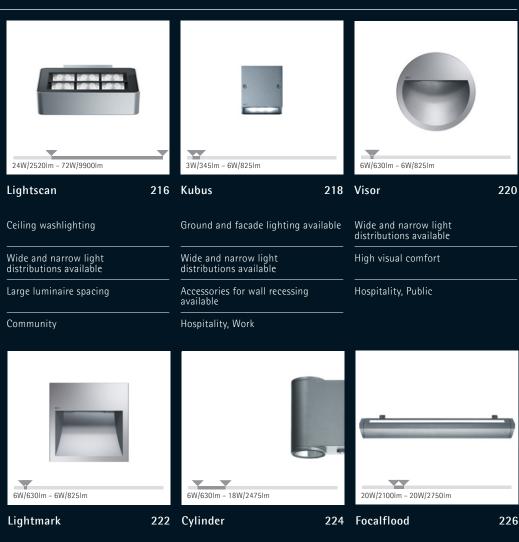

Vertical surfaces in the urban space contribute significantly to the spatial impression of squares, road junctions and buildings. Facade lighting is therefore an important element in urban lighting. The wide range of facade luminaires includes diverse lighting solutions – from grazing light on solutions – from grazing light on facades to path and route lighting around buildings.

Wide or narrow distribution

Wide light distribution very efficiently illuminates cantilever roofs or paths along facades. Narrow light distribution is suitable for the large area illumination of ceilings as well as for the open area lighting of squares and terraces.

Available as recessed and surface-mounted version

For a discreet appearance, ERCO offers recessed versions of facade Iuminaires. Surface-mounted luminaires represent a pragmatic and elegant alternative.

This distinguishes our facade **luminaires**

Variants for upward and downward lighting

Light directed upwards emphasises the height of facades – for a filigree or wide-area appearance. Light beams directed downwards also enable routes along the facade to be illuminated.

Protection rating IP65

Luminaires with IP65 protection rating are dusttight and protected against the entry of water jets from all directions.

Accessory for mounting variants

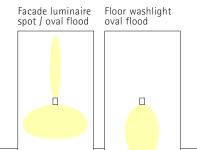

Some lighting tools can not only be used on buildings, but can also be mounted as recessed wall luminaires.

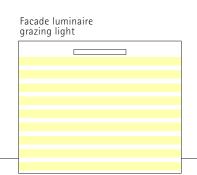

ERCO individual

Our "ERCO individual" service can be used to implement customerspecific modifications such as other housing colours or LEDs according to the specific project.

www.erco.com/individual

Grazing light

Grazing light wallwashers enable alignment upwards or downwards.

Lightscan - Dynamic ceiling illumination for a wide spatial impression

Floodlighting ceilings in airports, railway stations, arcades and passages

Lightscan facade luminaires give ceilings a light and spacious appearance even in demanding environments such as arcades and railway stations. The robust luminaire's uniform, bright floodlighting enables economical ceiling illumination due to large luminaire spacing. High luminous fluxes and efficient lighting technology ensure an excellent lighting level – especially in high rooms. Two different distributions - wide or narrow provide the perfect solution for

illuminating wide ceiling areas. The maintenance-free optoelectronics protect resources thanks to their high efficiency and reduce operating costs.

Cylinder – Universal and elegant

Façade lighting with many variations

Accentuating historical facades with grazing light or subdividing large facade areas is one of the strengths of Cylinder facade luminaires. The lighting technology offers suitable possibilities for this: narrow or wide light distributions upwards and downwards, or downwards only. The upper light beam is slightly directed towards the facade to avoid spill light – in accordance with Dark Sky requirements. For the downward distribution the facade luminaires include variants with a semi-cir-

cular light beam on the ground and a light beam that ends just in front of the facade. All have the characteristic grazing light for strikingly emphasising textures on the facade

Focalflood – Grazing light to perfection

Emphasising façade surfaces with white light

Grazing light delivers incredibly effective illumination of building surfaces and emphasises details through high-contrast shadows – such superb results are achieved with Focalflood façade luminaires. Optimised for grazing light, their lens system enables wide luminaire spacing, still producing excellent uniformity on the façade. The luminaire is easily oriented and smoothly adjusted to further optimise its grazing light. The Focalflood façade luminaire offers a highly precise, narrow light dis-

tribution over the whole wall to minimise spill light. Focalflood façade luminaires thus provide a creative basis for transforming façades into an eye-catching feature, washlit with magic grazing light.

Linear. Magical light. Bollard luminaires

A wide range of lighting tasks around buildings exists – ranging from the functional lighting of paths and stairways to open spaces. Bollard luminaires with various, predominantly asymmetric flood light distributions solve these tasks with high visual comfort. Due to precise limitation of the light beam, all luminaires meet dark sky requirements.

This distinguishes our bollard luminaires

Floor washlights wide or narrow distribution

The wide light distribution of floor washlights is especially suitable for lighting paths beside walls and facades. The narrow light distribution of floor washlights is predestined for the illumination of squares and terraces.

Various sizes

The luminaires in the ERCO product range cover a wide variety of lumen categories, thus offering appropriate solutions for a wide variety of lighting tasks.

Dark Sky technology

Horizontal plane

ERCO has perfected Dark Sky technology for its bollard luminaires. Light pollution is prevented because no light is emitted above the horizontal plane. In addition, glare to passers-by and drivers is avoided.

Protection rating IP65

All bollard luminaires with IP65 protection rating are dusttight and protected against the entry of water jets from all directions.

Safety class II

For luminaires with safety class II, live components have additional protective insulation. A protective conductor connection is therefore not required.

Floor washlights for open area lighting

Bollard luminaires with 360° radial distribution are suitable for the planar illumination of squares and terraces.

Bollard luminaires with 180° light emission are suitable for paths and routes. They form a product family together with 360° light distribution bollards.

Accessory for mounting variants

ERCO's system design allows different mounting variants. See the overview of accessories to find suitable products for your individual installation situation.

Our "ERCO individual" service can be used to implement customerspecific modifications such as differing housing colours or LEDs according to the specific project.

www.erco.com/individual

Castor - The magic of light

A lighting tool for pathways and squares

The Castor bollard luminaire visually connects paths and squares outdoors: two light distributions and three construction sizes enable nuanced lighting designs with just a single luminaire range. Its innovative optical system with ringshaped lens creates either light distribution aligned at 180° to one side for paths, or 360° light distribution for open areas. The Castor light at the backers and contained to the last of the contained to the last of the castor light at the backers and contained to the last of the castor light at the last of the castor light at the last of the castor light at the last of the l lighting technology is designed for uniform illumination in both of these applications. Luminaire spacing of up to 10m is possible without compromises in terms of glare control. ERCO Dark Sky technology prevents emission of light above the horizontal. Good visual

conditions for passers-by and vehicle drivers is ensured thanks to the concealed optic.

This distinguishes our recessed downlights

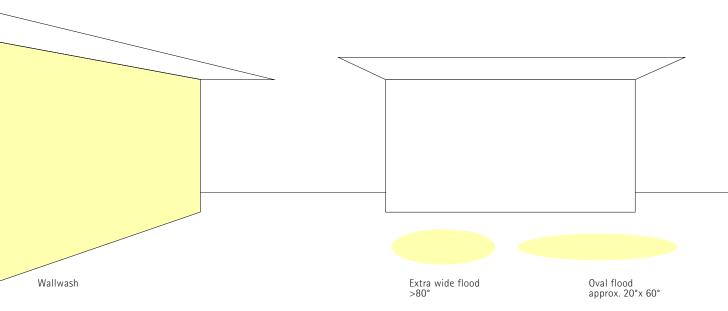

Always the right light distribution

Whatever you wish to illuminate, with ERCO you'll find the right light distribution – from accenting to wallwashing.

Shallow recess depth

ERCO develops special luminaires with low recess depths which despite very limited installation conditions feature high visual comfort and high quality of light.

Lens wallwashers

The asymmetric light distribution achieves the economical, uniform illumination of walls and facades.

Large luminaire spacing

For some wallwashers, the luminaire spacing may be up to 1.5 times the distance to the wall. Specific information is provided in the wallwasher tables at www. erco.com. A computer-aided calculation is recommended for assessing possible light beam spreads on side walls.

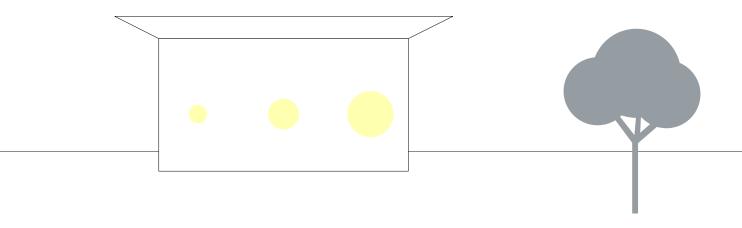

Customise

"ERCO individual" offers extensive options for the customising of product ranges:

www.erco.com/individual

Pivotable directional spotlights

The narrow beam angle of the directional spotlights enables architectural details to be highlighted or objects to be accentuated as precisely as in a museum. The luminaire head can be swivelled by up to 20° for this purpose.

Flood 25° - 35°

Very high visual comfort

Narrow spot < 10°

The darklight reflector combines maximum visual comfort with an optimum light output ratio.

Protection rating IP65

All luminaires with IP65 protection rating are dustproof and protected against water jets from all directions.

Quintessence round – The system solution for excellent visual comfort

High visual comfort and optimum light quality – in indoor and outdoor areas

Quintessence recessed down-lights bring the visual comfort and quality of light of downlights, lens wallwashers and directional spotlights to outdoor spaces. The downlights and lens wallwashers achieve a high level of uniformity with good glare control and are perfect for illuminating wide areas. The extremely wide distribution of the downlights with 90° beam angle and 40° cut-off enables large luminaire spacings. For precise accents, the optic of the directional

spotlights can be tilted by 20° and rotated through 360°. IP65 protection makes Quintessence recessed downlights the ideal tool for canopied outdoor spaces.

Compact - Efficient and economical

Brilliant light for roofed areas. Compact – ideal for outdoor use The need for high performance lighting applies equally to the exterior environment. The Compact downlight combines brilliant light with the formiliar durability of

with the familiar durability of ERCO's other exterior solutions. Extra wide flood and oval flood as different light distributions enable its use in passageways and arcades as well as on the terrace of a private residence. Compact also supports superb vertical illuminance with its wallwashing distribution.

Specifications

Size 3 ∅ 140mm (max. 1100lm) 4 ∅ 177mm (max. 2200lm) 5 ∅ 215mm (max. 3300lm) 7 ∅ 249mm (max. 4400lm) 8 ∅ 283mm (max. 5500lm)

Light colour 3000K CRI 92, 4000K CRI 82, further light colours on request

Pragmatic. Convincing. Surface-mounted luminaires

Very pragmatic considerations often lead to the use of surface-mounted luminaires: In outdoor applications there are often no suspended ceilings but concrete ceilings or supporting structures. The deliberate choice of a lighting concept with surface-mounted luminaires considerably reduces installation complexity, for example in solid ceilings or in existing buildings, and planning can be flexibly adapted to the conditions.

Surface-mounted luminaires

Downlights and wallwashers

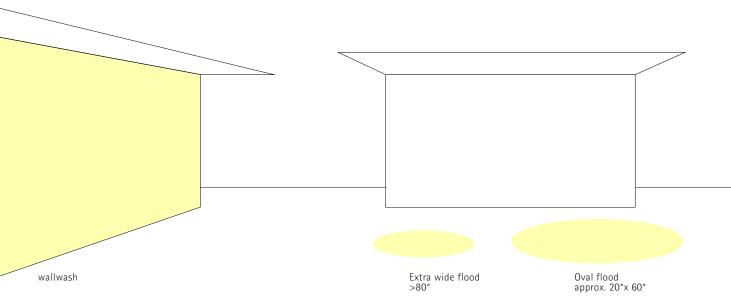

Compact	252	Lightscan	254
Downlights and wallwashers		Downlights in three sizes	
High visual comfort		Large lumen packages for high illuminances	
Large luminaire spacing		Flat luminaire design	
Hospitality, Community		Hospitality, Community	

This distinguishes our surfacemounted luminaires

Simple installation due to surfacemounted solution

In existing buildings or with solid ceilings, surface-mounted luminaires considerably reduce the installation complexity. Accessories such as spacers additionally help with surfacemounted installations.

Large luminaire spacing

With some wallwashers and luminaires with oval flood light distribution, the luminaire spacing can be up to 1.5 times the distance to the wall. Specific information is provided in the wallwasher tables at www.erco.com. A computer-aided calculation is recommended for assessing possible light beam spreads.

Always the right light distribution

Whatever you wish to illuminate, with ERCO you'll find the right distribution, from wide beam floodlighting to uniform wall-washing.

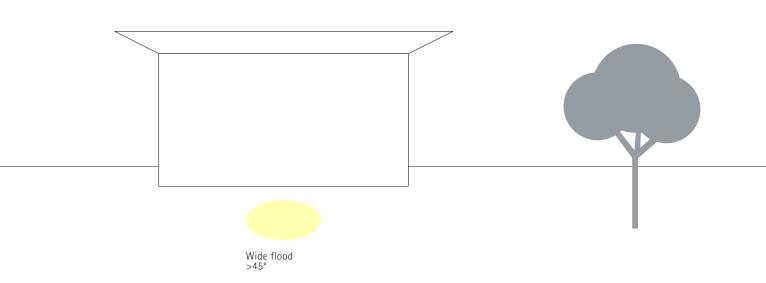

Improved visual comfort

ERCO has developed luminaires especially for demanding visual tasks which offer increased visual comfort due to their special housing shape and high quality optical components.

Customise

"ERCO individual" offers extensive options for customising product ranges: www.erco.com/individual

Oval flood, freely rotatable

The round version of the oval flood Spherolit lens can be freely rotated to align the lighting optimally to various objects.

Protection rating IP65

All luminaires have an IP65 protection rating and are therefore dustproof and protected against the ingress of water jets from all directions.

Compact – Efficient and economical

Perfect solution for illumination in existing buildings. Compact is the versatile tool

Lighting design based on surfacemounted downlights need not be a workaround. The Compact downlight combines brilliant light with the robustness of outdoor luminaires. Compact as a surfacemounted downlight is the perfect solution for illumination in existing buildings, where recessed mounting is not possible. Extra wide flood and oval flood as different light distributions enable its use in passageways and

arcades as well as on the terrace of

a private residence. Compact can just as easily be used for vertical illuminance through wallwashing.

Lightscan – Powerful light for large spaces

Effective and efficient general lighting for passages and traffic routes

Lightscan ceiling surface-mounted luminaires provide strong, efficient general lighting for large rooms requiring higher protection ratings in indoor and outdoor areas along with easy maintenance. The higher luminous flux levels enable illumination over large distances and guarantee an excellent lighting level on the floor. The light distributions wide flood, extra wide flood and oval flood are ideal for use in railway stations, passages and arcades as well as traffic areas in

buildings. The maintenance-free optoelectronics protect resources thanks to their high efficiency and also reduce operating costs.

Watertight. Effective. Recessed floor luminaires

Recessed floor luminaires attract attention because both the light sources on the ground as well as the direction of light from above to below is unusual and therefore particularly noticeable. They are therefore ideal for effective architectural lighting from accent lighting to uniform wallwashing. Recessed floor luminaires also perform technical tasks just as effectively. As information lighting they indicate pathways and mark entrances for example.

Quality of light with precision

ERCO luminaires project their light via highly efficient Spherolit technology. This creates precisely defined beams of light without spill light. Noteworthy is that high illuminance is achieved even with small wattages.

Light from the ground

Whatever you wish to illuminate, you'll find the right recessed floor luminaires with the right light distributions in the form of ERCO uplights, directional spotlights, lens wallwashers and grazing light wallwashers.

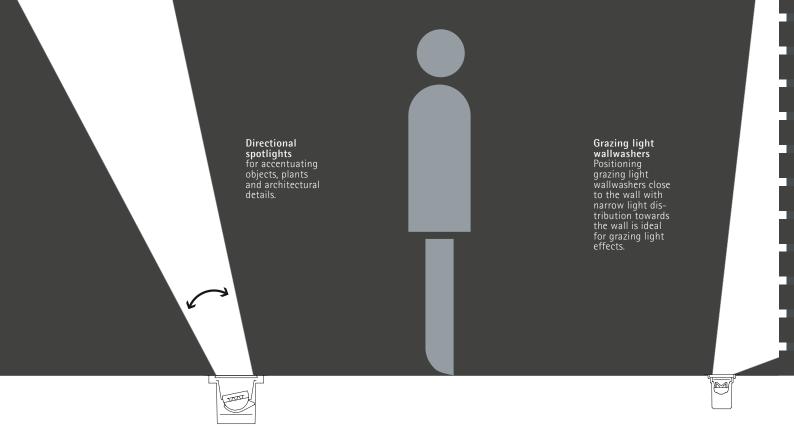

This distinguishes our recessed floor luminaires

From small to large

The right size and lumen package for any project: from uniform facade lighting to the functional orientation lighting of urban squares.

Pivotable

Directional spotlights and grazing light wallwashers can be simply and precisely adjusted for optimum alignment of the light beam. The light is thus emitted to exactly where it is needed.

High visual comfort

To achieve a particularly high level of visual comfort, ERCO has developed luminaires that ideally shield the light source thanks to their special housing design.

Customise

"ERCO individual" offers extensive options for the individualisation of product ranges, e.g. with antislip glass: erco.com/individual

Certified: IP68 and safety class II

All ERCO recessed floor luminaires have an IP68 protection rating with safety class II. This makes them suitable for outdoor and indoor use and also means wiring complexity is kept to a minimum.

Strong mounting enclosure

Robust, corrosion-free mounting enclosures allow recessed floor luminaires to be walked on and driven over.

Tesis round - The benchmark in the outdoor area

An innovative archetype in outdoor lighting

Tesis has long been a regular feature in the outdoor range. In a completely upgraded version, it now delivers an entirely new level of performance. Innovative photometrics ensure maximum brilliance and efficiency. A considerably flatter housing thanks to LED technology ensures exceptionally straightforward installation – in both round and square version. The robust polymer housing is fully corrosion-resistant and designed to ensure long life and ease of use. Be it directional luminaire, uplight

or wallwasher, Tesis sets the benchmark in outdoor lighting.

Site – Emphasising wall structures for a three-dimensional effect

Grazing light wallwashers accentuate surface texture on walls and façades

Site emphasises the tactile qualities of architectural materials – the grazing light wallwasher makes even the finest structures of wood, concrete and brick and rough surfaces such as natural stone clearly visible. Site creates high-contrast, structurally appealing effects with light and shadow. The light can be comfortably tilted in both directions up to an inclination angle of 10 degrees. Thanks to its asymmetric distribution, the

grazing light wallwasher generates an extremely uniform beam even when the luminaire is positioned up to 30cm in front of the wall. Site creates both atmospheric light displays and efficient outdoor lighting.

General Information

With the issue of this publication all previous documents become invalid. For the validity of this publication we reserve the right to make technical and formal changes to our products in the interests of improvement or to take account of changes in statutory regulations. We will gladly provide current data upon request.

All ERCO product documentation can be found at www.erco.com.

Many products are protected by industrial patent rights.

LED modules are part of the luminaire.

Voltages given in this catalogue refer to a mains frequency of 50/60Hz.

Installation in accordance with the respective national installation regulations.

The standard finish of our products is specified in the product description. The following colours can also be supplied: white RAL 9002, white RAL 9010, silver RAL 9006 and black RAL 9011. Other colours on request.

ERCO luminaires are designed, manufactured and tested in accordance with the applicable standards and technical regulations. The technical tests are implemented at 25°C ambient temperature

The luminous flux values and photometric data also relate to a 25°C ambient temperature. Deviations to the specified data are possible with other temperatures.

Information about LEDs Due to the production process of LEDs, the specified typical LED parameters

show statistical values only. Deviations are possible within the typical size range of LEDs and are within the usual industrial tolerances. The service life of an LED largely depends on the ambient temperatures. Therefore, the luminaires should not be installed near other sources of heat such as heating pipes, etc. Furthermore, these luminaires should not be operated when exposed to direct

Current information about the LEDs can be found on the specification sheets of the respective articles.

DALI (Digital Addressable **Lighting Interface)**DALI luminaires are acti-

vated by any DALI lighting control system. A control unit (e.g. dimmer) with DALI Broadcast Signal may be used for specific purposes. All electrics must be installed as specified in the DALI standard. ERCO DALI control gear is compatible with the DALI 2.0 standard. General information on DALI is available at www.digitalilluminationinterface.org.

RGBW luminaires

With use of a DALI system with colour management (device type 8) the luminaire is controlled with one address.

With operation in a system without colour management the luminaire can be reconfigured to three or four

Luminaires with tunable white

The tunable white component of a luminaire can only be controlled with a DALI system with colour management (device type 8). These systems detect the luminaire with one address.

Alternatively, spotlights and recessed luminaires with tunable white can also be controlled via Casambi Bluetooth; individual product ranges can also be controlled via Zigbee 3.0

Luminaires with Casambi Bluetooth To control luminaires with

Casambi Bluetooth, a mobile device with the free Casambi app or hardware approved for Casambi Bluetooth is required. The range of the Casambi mesh network can be affected by structural conditions.

Overvoltage protection for electronic control gear

If protection from spikes is required, e.g. when switching inductive loads, ERCO recommends the use of separate overvoltage protection

Electronic control gear in 3-circuit installation

To avoid damaging the electronic control gear, the neutral conductor of control gear in 3-circuit installations must never be disconnected.

Phase dimmable luminaires

LED luminaires can be dimmed depending on

the type of control gear. Phase dimmable luminaires may only be used with suitable dimmers. Installation information in the mounting instructions of the luminaire and those of the dimmer manufacturer must be observed.

The dimming range specified in the product description is determined with regard to current dimmers. The actual dimming range available may vary from the product description, depending on the dimmer used and the load situation.

To ensure proper functioning of the dimmer, especially when using uni-versal dimmers, check the luminaire/ control gear/dimmer combination before installation.

Information on environmental protection and luminaire disposal ERCO products are manufactured in compliance with the REACH regulation and the RoHS directive.

WEEE

The WEEE (Waste Electrical and Electronic Equipment) directive of the EU for electric and electronic devices regulates the free return and envi-ronmentally friendly disposal and recycling of old and used electrical equipment by manufacturers and importers. The Directive aims to reduce the amount of electrical and electronic waste and encourage everyone to recycle the equipment.

Disposing of luminaires ERCO has met the requirements of the WEEE Directive since March 2006

in that it has clearly marked all its products with the symbol of the crossed-out bin. These products may be returned free of charge. Alternatively, at the end of their service life, luminaires may be disposed of at appropriate local facilities provided for the disposal or recycling of electronic equipment.

DIN EN ISO 9001:2015

The ERCO Quality Management System has been organised in accordance with DIN EN ISO 9001:2015. The certified system includes: design/development, production, assembly, sales and service. ERCO sales organisations worldwide are always included in the management system and are regularly audited by ERCO auditors.

DE AEOF 102810

ERCO GmbH was awarded the AEOF (Authorised Economic Operator Full) certificate on 27/8/2010. This certification confirms ERCO GmbH to be a particularly reliable and trustworthy partner in international trade. It governs the safety and efficiency of the supply chain through to the

The guarantee terms pertaining to the voluntary manufacturer's guarantee of 5 (five) years given by ERCO GmbH on ERCO products shall apply in addition to our General Terms and Conditions. Full details of these current guarantee

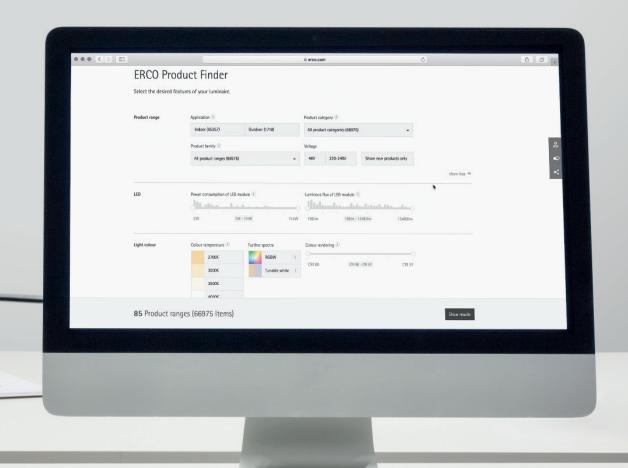

terms are available on request by e-mailing guarantee@erco.com
